

Andrea Fryda Arnio, class of 2002

Andrea Arnio, a proud member of Cardinal Mooney High School's Class of 2002, exemplifies the school's core values of sanctity, scholarship, and discipline. During her time at Mooney, she was an active student-athlete, competing in both volleyball and softball while developing the leadership and work ethic that would guide her future success.

After graduation, Andrea earned a Bachelor of Science in Mechanical Engineering from Youngstown State University. She began her career with Novelis Corporation as a college intern and has spent more than two decades growing with the company, the world leader in rolled aluminum products and sustainable solutions. Throughout her career, Andrea has held leadership roles across engineering, procurement, and reliability, and today serves as Senior Manager for North American Procurement Operations, overseeing more than \$250 million in annual capital investments and \$300 million in operational support contracts.

Andrea remains committed to education and service, serving on the Youngstown State University Mechanical Engineering Industrial Advisory Board, where she supports ABET accreditation and helps shape the next generation of engineers. Her life is also marked by resilience and compassion. Following the loss of her first daughter, Olivia, in 2015, Andrea and her husband, Mark, founded Olivia's Grace, a nonprofit dedicated to supporting families in need and spreading hope.

Andrea and Mark, who met in college, live in Girard with their daughters, Emma and Ava, who attend St. Rose School. Through her leadership, faith, and service, Andrea continues to live out the values instilled in her at Cardinal Mooney High School.
